Connectivity across all communication platforms is the key theme throughout the plan with the intent, as stated in the plan itself, to align with the City's goal to strive for excellence in service by planning ahead of the curve. Due to the continuing innovations and improvements in IT, the Plan should be considered as a guide for prioritizing investment and not a fixed directive on purchases. We will continue to work with the City to identify opportunities for using technology to enhance service delivery to its citizens balancing costs and benefits.

Based on our assessment of the City's needs, we have prioritized the needed capital improvements to build upon each other as follows:

- Year 1 – Core Infrastructure Improvements
- Year 2 – Communications Transformation Improvements
- Year 3 – Security System Modernization
- Year 4 – Cellular Communications Improvements
- Year 5 – Cable Management Improvements and Systems Review, Evaluation, and Replacement Planning

Should you have any questions or comments regarding the plan, please do not hesitate to contact me or Steven Lease, General Manager.

**Best regards,**

Ben Johnson  
President
