

## STAINLESS STEEL WIRE ROPE MESH:

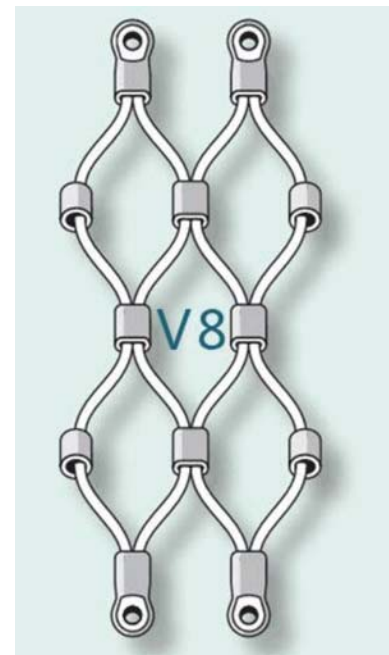

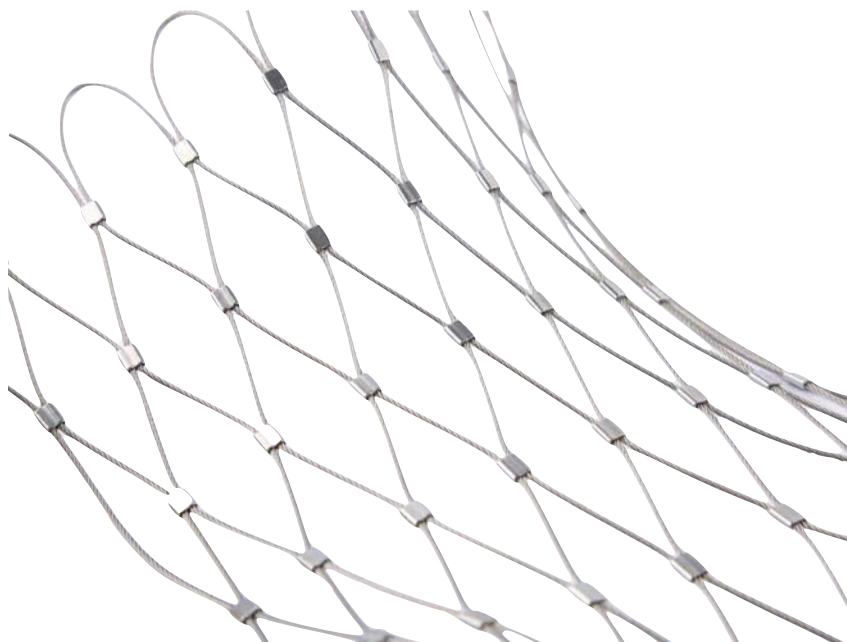

This material would be used everywhere except the arched top portion of the bridge. This material would be used on the railings going up the stairs.

Specifications: 2.4 mm ga. 75mmx75mm opening. Stainless Steel wire rope mesh - 304 or 316(marine grade)

Model	Wire Diameter	Mesh Opening	Normal Break
	Inch/mm	Inch/mm	Lbs
YT2076	3/32" / 2.4mm	3x3 / 76 x 76	920

Mesh to be used on stair railings, not on arched section atop bridge

---

## WELDED WIRE MESH:

This material would be fencing for the top, arched part of the bridge, and would act as support for the inward facing LED grid. What apertures are acceptable? Proposed aperture of 75x75mm.
