

Water Department Responsibilities

It is the City of Hapeville Water Department's responsibility to maintain water mains, as well as water service lines from the main up to (and including) the water meter. The water service line from the meter to the property is the responsibility of the property owner.

The City of Hapeville Water Department is responsible for maintenance of the sanitary sewer mains in the City. The individual property owners are responsible for their service laterals from the property all the way to the main.

The City maintains storm water structures that belong to the City. This includes ponds, ditches, and catch basins. Any of these structures located on private property are maintained by the property owner and may be inspected by the City.
